

FORMS AUTOMATION FOR FIELD SERVICE PROFESSIONALS

Field2base's award winning field automation software provides the ultimate mobility solution for Field Service companies who want to automate their work orders and reduce A/R cycles.

Maintaining work order records on loose paper forms is an administrative headache. It creates time delays and requires multiple steps to process. Paper forms take an excessive amount of time to complete and significantly delay reimbursements thru delays and errors. Field2Base enables Field Service professionals to use their own familiar forms, and immediately sends form data directly from the field to any CRM, ERP or Work Order Management System.

- ✓ Convert your existing State and Local paper forms into a digital format with limited end user training.
- ✓ Capture enhanced work order data such as photographs, barcodes, signatures, and more.
- ✓ Send captured data immediately to an email address, a web hosted database or your back office system using LAN, Wi-Fi, or Broadband Cellular.
- ✓ Remotely dispatch and complete work order tickets.
- ✓ Instantly process credit card and check payments at the customers location.
- ✓ Capture GPS information for work order verification and route management.

The screenshot displays a mobile application interface for a work order. At the top, there's a header with 'Job: Field2base' and 'Billing: March, 2009'. Below this, there are fields for 'Address: 123 Fake st', 'City: Raleigh NC', and 'Phone: 919-555-1212'. A calendar for March 2009 is visible, with the date 'Today: 3/26/2009' highlighted. The main section is titled 'Description of Work' and contains a dropdown menu for 'HVAC 2000 pro'. A list of HVAC brands is shown in a dropdown menu, including Adams, Addison, Aire-Flo, Amana, American Standard, Arcoaire, Axeman-Anderson, Ariston, Armstrong, Biasi, Bryant, Buderus, Burnham, Carrier, and Central Boiler. The bottom of the screen features a signature strip with a signature and a date.
