

FORMS AUTOMATION FOR GOVERNMENT SERVICES

Field2base's award winning field automation software provides the ultimate mobility solution for Government agencies who want to streamline how they collect and process information in the field.

Many governmental programs such as **Social Services, Health and Human Services, Probation and Parole, Public Safety, Education, Transportation, Inspections, Facilities Management (GSA)** and others require a daily presence "in the field". More often than not, the results of these daily activities are recorded on paper forms, which take weeks to process and are riddled with errors and omissions. Field2Base offers government agencies a simple, turnkey solution to automate their field data and provide world class service to their citizens.

- ✓ Digitize your existing agency forms while retaining the same "Pen and Paper" feel.
- ✓ Capture enhanced customer data such as photographs, barcodes, signatures, and more.
- ✓ Send captured data immediately to an email address, a web hosted database or your back office system using LAN, Wi-Fi, or Broadband Cellular.
- ✓ Secure your data with 256 Bit AES encryption.
- ✓ Dispatch work orders / case loads remotely and let workers spend more time in the field.
- ✓ Capture GPS information for work order verification and employee safety.

The screenshot displays a mobile application interface for a 'Child and Family Assessment and Service Plan'. At the top, there is a 'Case Number' field. The main title is 'Child and Family Assessment and Service Plan'. Below this is a yellow header for 'Assessment of Present Danger, Investigative Assessment, Safety Assessment & Safety Plan'. A 'GPS Verified' box shows coordinates 35.818 and 76.235. The form is divided into sections: 'PART I: ASSESSMENT OF PRESENT DANGER AT INITIAL CONTACT', 'A) Assessment of Present Danger Summary Format', 'Maltreatment', 'Child', 'Parent', 'Family', 'Other', and 'Visual Documentation'. The 'Visual Documentation' section includes a photo of a bruise on a child's arm. A text box contains the handwritten description: 'Bruise on left arm is about one inch in diameter'. A 'Send Form' button is visible at the bottom right.
