

## THE FIELD2BASE PLATFORM

# Field operations without paper, delays, or data gaps

Field2Base helps enterprise teams digitize the forms they use every day — then automates what happens next, so work keeps moving from the field to the office. One platform covers every stage of the process: design the form, capture data anywhere, connect it to your systems, and manage the results.

- Digitize your exact forms
- Works connected or disconnected
- Ad hoc & pre-filled forms
- Workflow automation
- Analytics & dashboards
- Enterprise integrations

## REAL IMPACT FOR YOUR BUSINESS

**Days → min**

From field capture to office visibility

**~50%**

Less time spent on documentation

**100%**

Complete, validated submissions — required fields enforced

**20+ yrs**

Trusted in regulated, field-heavy industries

## BUILT FOR THE INDUSTRIES THAT KEEP OPERATIONS RUNNING

- Field Service
- Construction
- Healthcare
- Utilities & Energy
- Government

## HOW IT WORKS

### Four steps from paper to insight

#### 01 DESIGN

**Build powerful digital forms in minutes**

- Drag-and-drop builder
- Business rules & logic
- No coding required

#### 02 CAPTURE

**Collect accurate data in the field**

- Mobile & offline capable
- Photos, signatures, GPS
- Real-time submission

#### 03 CONNECT

**Automate workflows & connect systems**

- Approvals & routing
- Dispatch & work orders
- Branded reports & alerts
- APIs, exports & integrations

#### 04 MANAGE

**Oversee users, security & operations**

- Dashboards & analytics
- Roles & permissions
- SSO, MFA & devices

MORE THAN A FORMS APP

# A complete field operations platform

## Digitize your exact forms

Recreate your paper forms exactly — same layout and branding — now with dropdowns, calculations, and complete, legible data.

## One app for every process

Inspections, work orders, safety checks, audits, timesheets, incident reports — all in one app instead of dozens of tools.

## End-to-end digitization

Pre-fill from your systems, capture offline, route through approvals, and map data to your ERP, GIS, or CMMS automatically.

## Built for real field conditions

Works connected or disconnected, and rugged-device tested — built for the technicians, inspectors, and nurses doing the work.

### POWERFUL FEATURES

 GPS Tracking

 Signatures

 Photo & Video

 Barcodes

 Calculations

 Conditional Logic

### FITS YOUR TECH STACK

Connects bi-directionally to the systems you already run — clean field data out, records back to pre-fill forms.

ERP

GIS

CRM

CMMS / EAM

Dispatch & work orders

REST APIs & webhooks

### COMMON USE CASES

Inspections & safety checks

Audits & checklists

Work orders & service tickets

Fleet & DVIR

Quality control

Time & materials tracking

Logs & records

Application & intake forms

Official & agency documents

### SECURE & RELIABLE

SOC 2 Type II

CERTIFIED

NIST 800-53

ALIGNED

HIPAA / HITECH

ALIGNED

TX-RAMP

CERTIFIED

### BRING THIS TO YOUR LEADERSHIP TEAM

Capture data. Automate processes.  
Gain real-time visibility.
