

Go Paperless and Go Forward.

Mobile Forms™. The start of your digital transformation.

Mobile Forms™ replaces your old paper forms allowing data to be sent to and from the field in real time.

- Access forms with no Internet connectivity.
- Capture and securely send field data.
- Android/iOS compatible.
- Maintain communication records.
- Sync data automatically.
- Integrate with existing systems.

Easily Create Customized Forms

- Fully customize fields, navigation and buttons – no scripting required.
- Create digital forms that look exactly like your paper forms.
- Use static drop down or scenario-based drop downs drawn from external files.
- Dispatch previously completed info using PreFill work orders.
- Built in credit card processing.

Powerful Technology

- Sent form data available in a variety of formats including PDF, CSV, and JPG/PNG.
- Integrate with backend systems through SQL and custom form API plugins.
- Secure cloud storage stores your field data for immediate access.
- Scale from 10 to 10,000+ users.
- Forms and data access distributed through groups, projects, and roles.

Incorporate Business Rules

- Incorporate standard business rules like required fields and character limits.
- Custom business rules created using a JavaScript Engine.
- Ability to create “if, then” scenarios.
- Streamline workflow by building in conditions and manager approvals.
- Add automation within the form or throughout a form’s workflow stages.

Secure, Reliable and Compliant

- Restrict information access with unique IDs for every device.
- 256-Bit AES encryption technology secures all communication.
- Field2Base services operate from multiple servers providing 99.9% guaranteed uptime.
- Encryption on data at rest and in motion.
- Sensitive information protected with built-in security features and data segregation.
